

Théo LAMBERT

Software Engineer

Arras, Hauts-de-France, France • contact@theolambert.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Full-stack software engineer with a strong focus on backend and infrastructure. I work across the entire development lifecycle with a strong emphasis on code quality and maintainability. My experience mainly relies on .NET environments, and I am progressively moving toward the Go ecosystem because I believe its simplicity, built-in concurrency model and explicit error handling foster readable and robust backend services.

Skills

Backend	Go (Golang), .NET
Frontend	TypeScript, Angular, React
Infrastructure	Docker, Kubernetes (RKE2), CI/CD
Databases	PostgreSQL, MariaDB, SQL Server
Tools	Git, GitHub, GitLab, Azure DevOps, Linux, Neovim, Tmux
Practices	TDD, Software Craftsmanship, Agile
Languages	French (native) • English (C1)

Experience

Full-stack Web Developer

November 2024–Present

Ordre National des Infirmiers — Arras, Hauts-de-France

- Development and evolution of the healthcare institutions portal allowing organizations to declare nurses in compliance with regulatory obligations; implementation of backend and frontend features (.NET, Go, Angular, React)
- During the transition to HDS-certified hosting, migration of the CI platform: installation and configuration of Jenkins on Windows Server, restoration of existing pipelines and reactivation of CI/CD
- Design of an experimental Kubernetes environment to industrialize containerized tools deployment in an infrastructure historically based on virtual machines; setup of an RKE2 cluster (Rancher, Longhorn, Harbor, Helm) across 5 VMs used as a testing and learning platform for the infrastructure team
- Structuring of the technical documentation of the information system: application mapping, flow and sequence diagrams using Mermaid on Confluence; documentation used for onboarding and cross-team communication
- RGAA accessibility audit of an internal application developed by a contractor and definition of a multi-year improvement plan to ensure regulatory compliance

Software Developer

November 2022–October 2024

Sumit — Villeneuve d'Ascq, Hauts-de-France

- Contribution to the redesign of a legacy WinForms ERP (2003) into a modern web architecture (.NET, Angular)
- Development of complex business features: advanced contractual forms, pricing rules, nested conditional fields and workflows involving multiple validation actors
- Evaluation of technical choices through prototypes: end-to-end testing with Playwright, internal SQL linting tool and experimentation with architectural patterns
- Successful migration toward a performant, robust and maintainable web application with high client satisfaction

Software Developer / Project Manager
Enedis — Lille, Hauts-de-France

September 2019–October 2022

Industrialization of a technical intervention analysis POC

September 2021–October 2022

- Industrialization of a POC that won a national internal innovation award, designed to identify unnecessary field interventions using a BERT-based NLP model: transformation of a regional Flask prototype into an application integrated into the national information system, with potential savings of several million euros annually
- Containerization, CI/CD pipelines (GitLab CI), Kubernetes deployment and implementation of observability tools (Grafana)
- Contribution to the modernization of the internal framework (Symfony / Angular) toward a reusable component architecture; organization of an internal hackathon (30 developers) to extend the ecosystem

Development and maintenance of internal applications

September 2019–August 2021

- Within the National Expertise Center (30 developers), design and development of new features for an internal application used to plan, track and report expert field missions (Angular, Symfony): UX/UI improvements and creation of a modular dashboard system enabling KPI extraction and improving visibility of expert activities
- Mentoring and onboarding of new developers within the team

Studio Owner / Audio Engineer
Hauts-de-France

2014–2021

- Management and development of an audio production studio (client projects, music production)
- Design and implementation of digital audio networks
- Project management, client relations and training

Education

CESI Lille

- *Master's Degree — Architecture and Software Applications of Information Systems (RNCP Level 7)* 2022–2024

Projects

Kelmot.net — Multiplayer Word Game (Go, React) [\[site\]](#)

2026

- Word guessing game inspired by Motus with a retro Windows XP style interface
- Solo mode, private rooms and competitive matchmaking with ELO ranking
- User accounts (OAuth), trophies system, contacts and notifications

Tipimock — API Mock Platform (Go, React) [\[demo\]](#)

Jan 2026

- API mocking platform with dashboard to test application workflows involving email sending

Scratch.nvim — Neovim Plugin (Lua) [\[github\]](#)

April 2023

- Open source Neovim plugin for managing temporary “scratch files”

Babyfoot Lille Métropole — Web Application (SvelteKit) [\[audit\]](#)

March 2023

- Order management application for a local foosball club
- Pro bono project

Cedar — TypeScript CLI [\[github\]](#)

April 2022–December 2022

- Open source CLI used to generate NFTs on Solana following the Metaplex standard

Interests

Padel • Running • Music (guitar, bass, recording) • Motorcycles (road trips)
